

A light to my path. Psalm 119:105

The Nature of God

The essence of God's nature is the Father, Son, and Spirit of Life. As Father, God is Abba, which means daddy to all who accept him. God is the Son, Jesus, who manifested in a human body and lived for thirty-three years until it was time to pay the sacrificial price for humanity's redemption. God's Spirit of Life is the Holy Spirit, who is the synergy and energy that flows through the essence like electrons orbiting an atom. Father, Son, and Holy Spirit together are the Godhead known as the Trinity. Each member of the Trinity is alike in thought and word; yet each has a different role, a unique personality. They share a powerful bond. Beloved, it is God's nature to love. Therefore, he puts his love in our spirit when we accept Jesus. God's nature is to give, and he always gives abundantly because he is limitless. Therefore, he gives divine health to our physical bodies when we ask him for it. God has a redeeming nature. He wants each person to know him as their father and trust him to give them a long life without emotional, mental, or physical sickness. When we take hold of the tangible substance of the Holy Spirit in us and believe God will give us divine health, we can ask for and receive it. We only need to trust him to give it. Shalom!!
