

A light to my path. Psalm 119:105

Uncertainty!

Have you ever been uncertain about something or someone? When we know beyond doubt something will happen, we are certain of it. I have experienced both. Uncertainty is doubt about something or someone. What causes uncertainty? It happens when our actions do not align with our words.

Children learn this quickly when their parents' actions do not align with their words. A parent's promise to their child to do something gives the child an expectation that it will happen. Frequent unkept promises to a child turn their expectation into uncertainty.

The same happens between spouses and between employees and employers.

Beloved, there are many distractions around us. Uncertainty is one of them. We will experience uncertainty in our lives! Therefore, we should embrace it because a walk of faith is uncertain. It is in our state of uncertainty that God fulfills his gracious promises.

Being certain all the time does not require us to do anything by faith. When we master the walk of faith, uncertainties will be like getting a present with a wonderful surprise inside.

Shalom!!
